

# Osteoporosis can affect anyone

**1 in 3** women over 50 and **1 in 5** men will experience fractures due to osteoporosis.<sup>1</sup>

Bone mineral density by dual-energy X-ray absorptiometry (DXA) or Quantitative Ultrasound (QUS) technology is an excellent aid in the diagnosis of osteoporosis.

Ask your clinician for more information or to set up an appointment.

1. According to Randell A et al. 30-50% of women and 15-30% of men will suffer a fracture related to osteoporosis in their lifetime. Randell A, Sambrook PN, Nguyen TV, et al. (1995) Direct clinical and welfare costs of osteoporotic fractures in elderly men and women. *Osteoporosis Int* 5:427-432.
